

J.H. RYDER MACHINERY LIMITED

New Forklift Operator Course Overview

This in-depth full certificate program was developed to meet the specific needs of people with little or no previous lift truck experience. The 3-day program provides certification on one type of machine while the 5-day program will provide certification on up to four types of equipment.

Topics covered include:

Theory: 8-hour session (*Eight Person Maximum*)

- Introduction (Review of recent accidents, Importance of Training)
- Explanation of Legislation, Standards and Guidelines
- Engineering Principles of Design (Stability)
- Pre-Operational Inspection (In-Class and On-Floor)
- Safe Operating Guidelines
- Pedestrian Safety
- Fuel Source (Propane and Battery)
- Summary
- Written Test

Practical: (*Maximum of four people per session*)

Practical evaluations require from 2 to 4 days to complete allowing the trainee extensive time per truck to gain confidence and experience on each piece of equipment.

- Pre-Operational Check
- Starting, Stopping, Steering
- Accurate Maneuvering
- Proper Load Placement
- Loading Dock Safety
- Loading/Unloading
- Fuel Source (Battery/Propane)
- Competency Test

** This program may be conducted at a JH Ryder location near you or at your facility.
