

J.H. RYDER MACHINERY LIMITED

Pedestrian Awareness Course Overview

There are more than 10,000 accidents involving pedestrians every year in Ontario. This program has been developed to address/inform people of the hazards associated with material handling equipment and may be tailored to address the specific hazards in your facility. An informed pedestrian is a much safer pedestrian.

Topics covered include:

Theory: 1½ - 2 hour session (*Fifteen Person Maximum*)

- Occupational Health And Safety Act
- Duties of the Employer, Supervisor and Worker
- Industrial Regulation 851
- Fork Truck Accident Statistics
- Weight and Impact Force
- General Safety Rules for Pedestrians
(Intersections, aisles, loading docks, floor conditions, emergency exits etc.)
- Safe Pedestrian Aisle Assessment
- Pedestrian Video
- Test

Structure:

- Three sessions per day
- Fifteen people maximum per session
- Conducted at customer location
